Antigua

Leamy Guatemala City Mar. 1

Superb effect of volcano  
across foggy valley. Dark ridge  
with white & yellow & red knobs  
on high sunny light against  
blue fog gray of base of peak.

First view. This ridge with  
short houses trees & brown  
slopes, all bather in misty eyes  
& in foreground baranca cliffs  
with water on top.

Later baranca rises in fog  
with lots of platan flowers  
showing dark against foggy  
muddy ridge.

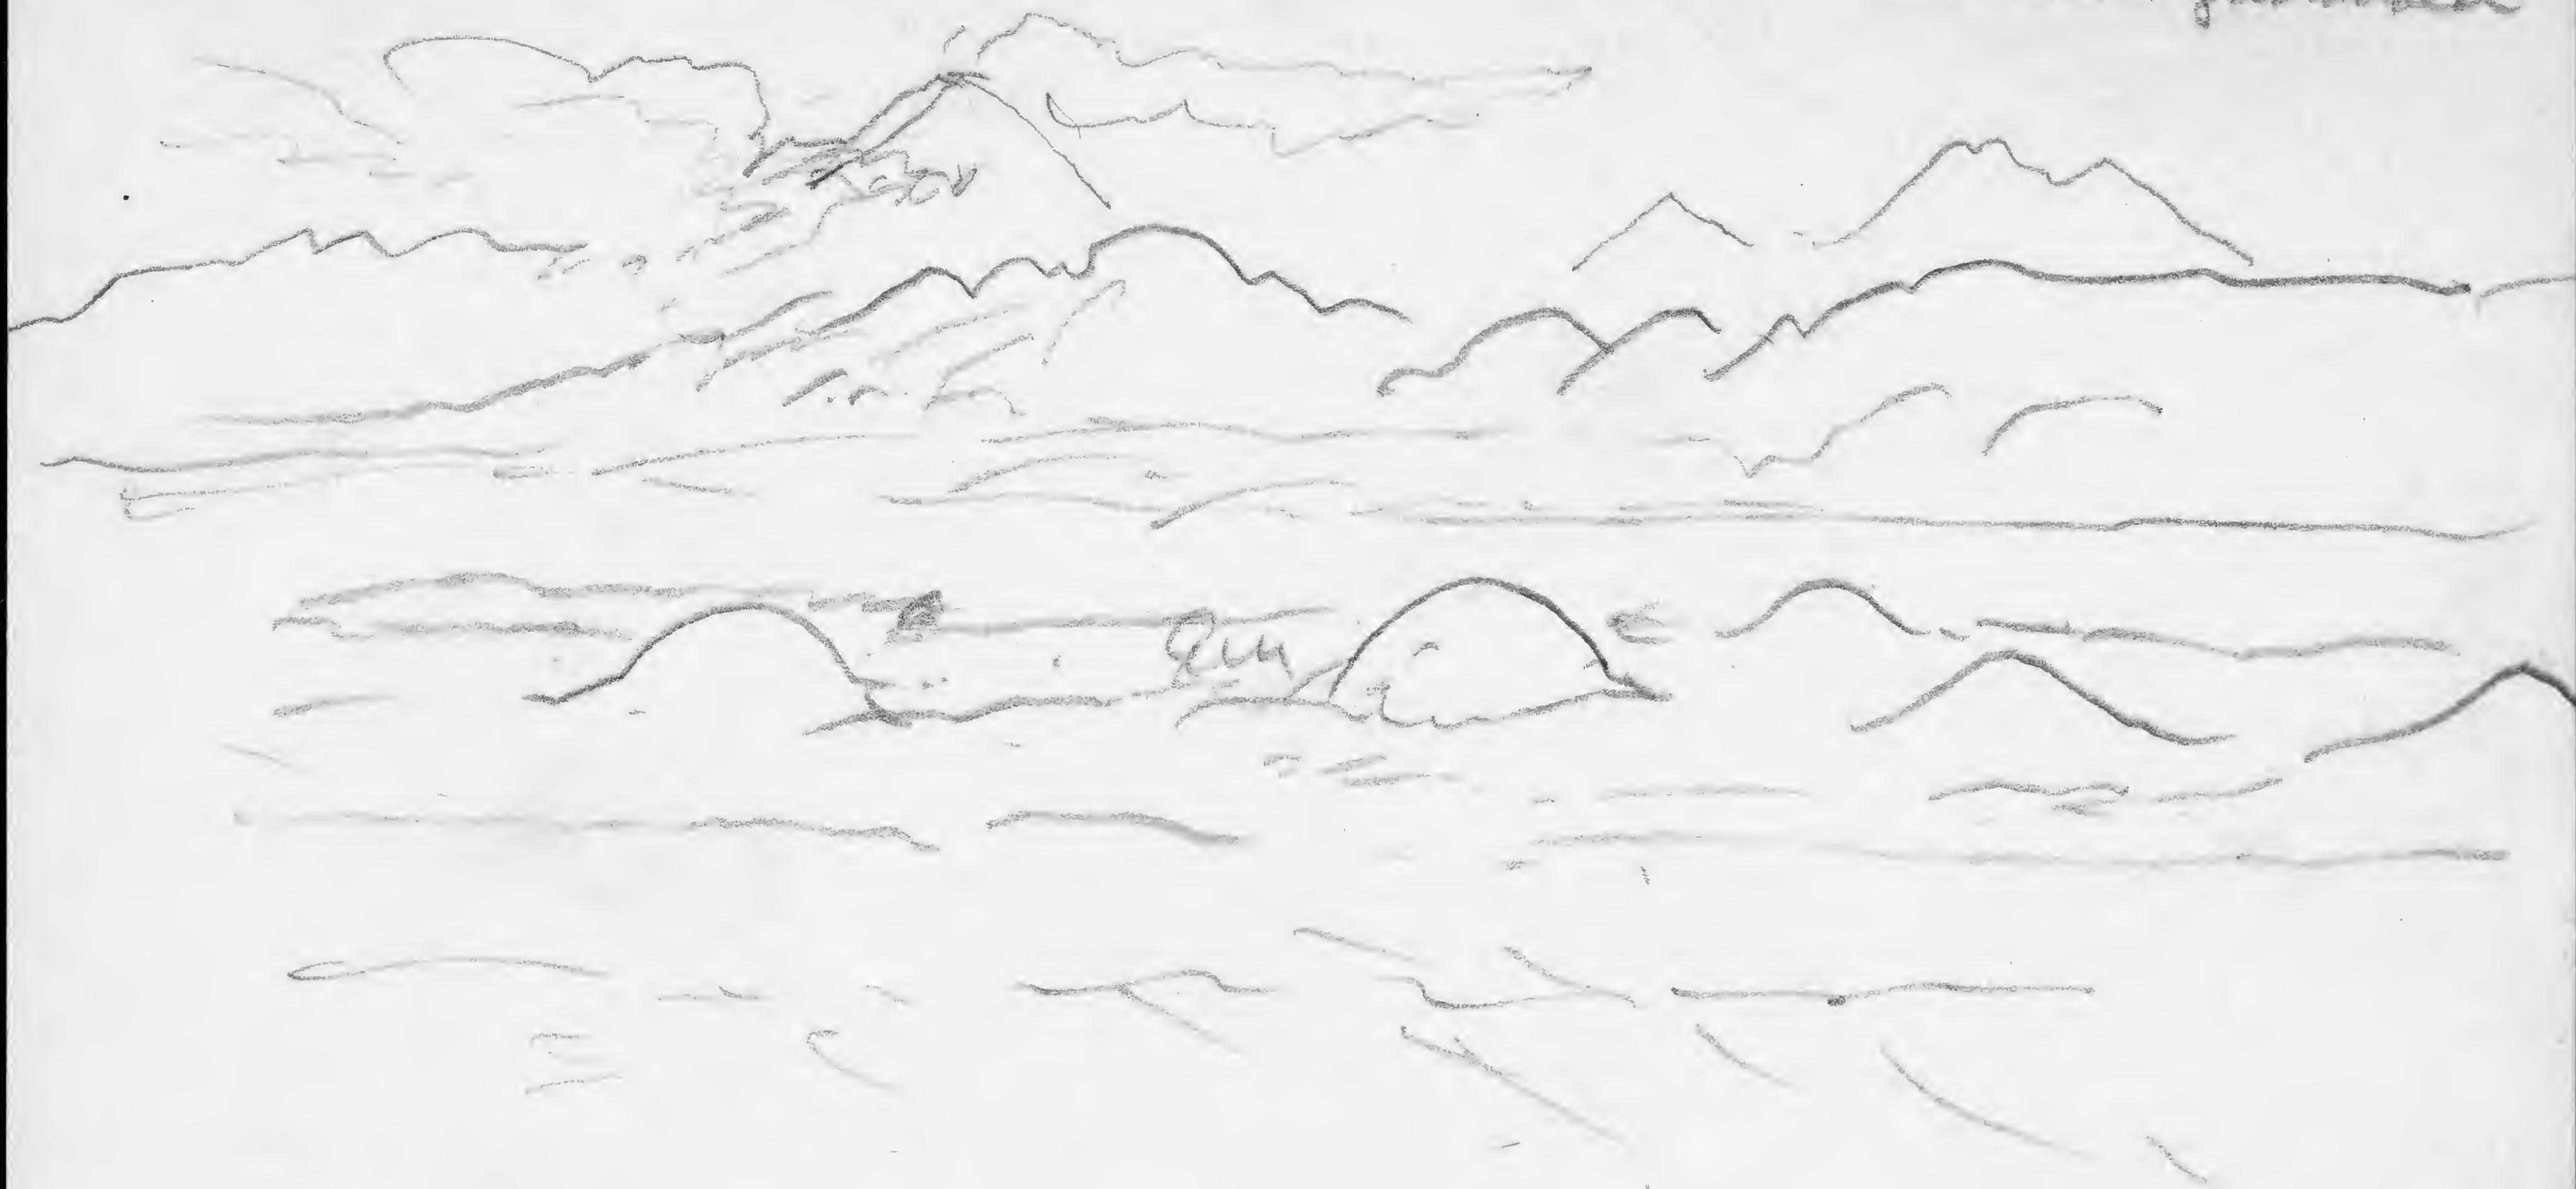

Dark blue  
overcast  
Foggy misty of Amalillo & fog with bright green.

are not over 30 feet in height  
and are rounded on the edges and  
generally, are oval.

There are no traces of buildings or of  
cut stone and it is difficult to say  
whether any of the mounds had buildings.

Guatemala City site  
W Holmelt Feb 28 1895

Here the ancient mounds extend over an area of a square mile or more and 40 structures of varied shapes are in view from a single point. There are doubtless many more beyond the range of vision and hidden in the Rancheros clusters. The fields are flat with dark black soil and all in corn now gathered.

### The Mounds

The majority are conical and oblong conical. The highest conical is about 80 feet in height & very steep, this and others having a slope of  $45^{\circ}$  or more. Most of the conical ones are from 20 to 50 feet in height. The flat mounds
